stopping at the Shoreham. "While it has
been nearly six months since I was in my
native country," said Mr. Rutger, "I
know enough about conditions to believe
that in the last desperate days of the
war the Germans will make an attempt

But conditions in Germany are becom-ing so acute that in desperation the Prussians are likely to destroy anybody and anything in their path. The Swiss are very well prepared, and I do not believe any one in Switzerland has any confi-dence in the German statement that Germany had no wrongful intentions toward Switzerland. If the Prussians think it will help matters any they would not hesi-tate, in my opinion, to ensiave every Bel-gian and Frenchman that they can get hold of. And when the day comes for

ness. There was one good road, a dirt road through the place, and I started to improve upon that. About six months later I went around to see how some ditches I had had dug for drainage were coming along, and would you believe it, I could not find my road? I know it I could not find my road: I know it sounds like a ghost story. Nobody swiped the road; it just naturally washed away and almost completely disappeared. Another short road a mile away was not touched, so I started to investigate. I found that the other road was solid con-crete and had withstood the heavy semi-

tropical rains and storms, "Nearly everyone laughs when I say "Nearly everyone laughs when I say my road left me an I never saw it again. The damage otherwise to my place was so great that I resold the place for a little less than I paid for it. I found that several other persons had had the same trouble and that no one took the trouble to tell the next purchaser. Just the other day I heard that my former property had been assessed at three times the rate I was taxed for it—all because the buyer took the trouble to make the roadbed so heavy that nothing less than the buyer took the trouble to make the roadbed so heavy that nothing less than a tidal wave could move it. If I had taken the trouble fe look seriously into practical methods of road building I would be very much richer,—for the property rapidly is being converted into a cattle ranch. Lots of farmers in Florida are doing the same thing, utilizing the long pasturing season, and growing beef cattle, but until someone got busy on the road proposition, it was a gamble."

DEPORTATIONS CALLED BENEFIT TO BELGIANS

Germany Tells U.S. that Method Solves Unemployment Problem.

Germany is forcing Belgians to leave collection. their homes and work in the country of their conqueror in order to benefit them and save them from the evils of idleness and employment,

This was the assertion of a memorial of the German government to United States government, which made public here last

memorial reads, in part, as follows:
"Those who are far removed from
the war theaters and can therefore form only a superficial opinion of the condi-tions obtaining in the occupied territories in the West, may not, perhaps, readily understand that the measures which war the Germans will make an attempt to work a greater hardship on the Swiss than she did on the Belgians. Germany is now getting to the point where she cares not a whit for neutral opinion. You ask when she ever did care for it? I think never.

Details Are Given, facts will first of all have to gain a clear conception of the extent of memployment lift Belgium and its consequences The principal cause for this unemploy-ment is to be found in the ruthless ap-plication of the British blockade even as against Belgium."

with the terror and might of German arms.

"But when she reaches for Switzerland you can bank on it that the German army will get a big surprise, and you can also bet that the Germans are on their last legs."

"But when she reaches for Switzerland you can bank on it that the German army women) are only partially employed. Thus in all 655,000 persons who formerly were earning their living as industrial workers are now dependent on public charity

"Not long ago." said Mr. Porter, "I bought a piece of land in Florida, about a thousand acres. I did that because I am not a very young man, and I wanted a place to live when I retire from busings."

The minimum of subsistence for the unemployed and their dependents reach a total of 300,000,000 francs, and they promise is future to amount to no less than 20,000,000 francs monthly. And although foreign the subsistence for the unemployed and their dependents reach a total control of the subsistence for the unemployed and their dependents reach a total control of the subsistence for the unemployed and their dependents reach a total control of the subsistence for the unemployed and their dependents reach a total control of the subsistence for the unemployed and their dependents reach a total control of the subsistence for the unemployed and their dependents reach a total control of the subsistence for the unemployed and their dependents reach a total control of the subsistence for the unemployed and their dependents reach a total control of the subsistence for the plants of the subsistence for the unemployed and their dependents reach a total control of the subsistence for the plants of the subsistence for th ployed and their dependents reach a total countries undertook to finance this relief work, in the last analysis the burden must be borne by the national economy of Belgium."

CLARK MAY RUN AGAIN.

Speaker Champ Clark will be Demo cratic candidate for President in 1920— "If things look right at that time." This was the gossip among statesmen, who are acknowledged champions of the Missouran. Close friends of the Speaker firmly assert he has made no plans to go out after the nomination. But scores of Clark men in both the Senate and House insist that he will be induced to run again, feeling secure in much of the strength he held in 1912, when he was given more than a majority of votes in the Baltimore convention.
